PREDICT MINERS WILL DISOBEY COURT ORDER

SENATE CLEARS DECKS FOR BIG TREATY BATTLE

Resolution Distasteful to Wilson is On Calendar.

By Associated Press Leased Wire Washington, Nov. 10-With apparently little change in the program of procedure developed over the week end despite increasing pressure from members who desire early final action so they might have a recess before the regular Mrs. Harold Stevens session of congress begins in thre weeks, opposing factions in the peace treaty ratification fight lined up today for a continuation of the struggle over reservations. Today's contest revolved around the reservation relating to ar ticle 10 of the League of Nations cov enant which was recommended by th foreign relations committee and which the administration senators desired most of all to defeat.

Except for the transposition of on phrase the reservation to article 10 1 the same as that which President Wi son declared during his western trip h would regard as a rejection of the treaty.

Its text follows:

"The United States assumes no obligation to preserve the territorial or political independence of any other country or to interfere in controversies between nations, whether members of the league or not, under the provisions of article 10, or to employ the military or naval forces of the United States under any article of the treaty for any purpose, unless in any particular case the congress, which under the constitution has the sole power to declare war or authorize the employment of the military or naval forces of the United States, shall by act or joint resolution so provide."

COUNCIL CONSIDERS MATTER. By Associated Press Leased Wire

Paris, Nov. 10 .- The Supreme Coun cil this morning considered the situation likely to arise from discussion of ratification of the peace treaty with Germany by the American senate.

The possibility of the treaty being put into force without ratification by the United States came under consider ation, says the Temps which declares that ratification by the United States is not indispensable. The newspape states that the question arises, however er, if it is possible to execute the treat without the participation of the United States in the numerous inter-allied com missions on reparations, control and the military contingents of occupation.

The Supreme Council reached an agreement this morning on the proce dure for convoking the first council of the league, taking into account the sit uation created by the opposition to rati fication in the American senate.

Many Steel Workers Want to Resume Work

By Associated Press Leased Wire Youngstown, O., Nov. 10 .- Numerou clashes between pickets and deserter from the strikers' ranks marked the op ening of the eighth week of the ste strike here. Observers estimated 200 additional workers returned to the steplants today.

Several fights ensued when picket visited homes of mill workers who ha announced their intention of returning to work today.

According to workers, committees rep resenting large numbers of mill men anxious to return to work went over the heads of local strike leaders today and took an early train to Pittsburgh to request permission of national head quarters.

WILL HEAR COMMITTEE

Pittsburgh, Nov. 10 .- The nations steel strike committee will be glad to receive a committee of Youngstow strikers if they will allow the opening of negotiations looking to a settlemer of the strike, said W. Z. Foster, secr tary of the committee who returned

from New York today. "We will talk it over with them they come," said Mr. Foster, "and they have a proposition from the stee companies we will be glad to sit in wit them. Otherwise the strike will go on.

Secretary Foster was pleased with the result of his trip to New York where he said labor was awake to th importance of the strike, and had pleds ed strong financial assistance.

Supreme Council Will Let Mackensen Go

Paris, Nov. 10,-Field Marshal vo Mackenzen, who was one of Germany' most successful commanders on the eastern front against the Russians an Rumanians, is to retur nto German from Saloniki. The Supreme Counci decided today to permit his return, tak ing into consideration his age and poo state of health. He is nearly 70 year

ASHTON STIRRED BY MYSTERIOUS FOLKS FRIDAY

Accosted By Stranger That Evening.

The bravery displayed by Mrs. Harold Stevens, of Ashton, is believed to have been the direct means of completely frustrating an attempted kid napping in that village Friday evening shortly after 6 o'clock. A big car, an unknown man wearing a black mask and an unknown woman figured in the mystery which has greatly excited the residents of the peaceful village.

Mrs. Stevens was returning from the ousiness part of Ashton to her home Friday evening at about 6 o'clock. As she walked near the alley leading to the Killmer livery barn, a muscularly porportioned, well built man stepped directly in her path and ordered her to stop. The woman noticed that he wore a black mask which covered his eyes and the upper part of his face. She re sisted the stranger's effort to approach close to her and stood ready to fight him off, when he quietly announced that he guessed that he had stopped the wrong person, and backed away to the

Mrs. Stevens cautiously proceeded on her way, but watched the movements of the stranger. He jumped into a big automobile that stood parked along the curb, switched on the lights and drove a short distance, then stopped. A wom an stepped from behind a tree and join d the mysterious man in the car

which was then driven rapidly away Friday night the basement of the Stevens home was thoroughly ransack ed and a large quantity of canne fruits and vebetables together with a sack of potatoes taken away. The enire community is at a loss to know the purpose of the visit of the mysterious

It may be true, as Senator Harrison of Mississippi declares, that Bolshe have progressed so far with plans for revolt against the government it were high time home guards were being formed. We don't know. This widely advertised "revolution" seems to most ing unemployment. of us a very gauzy affair, having the substance of a dream and the texture of a case of delirium tremens.

If it fell to us to plan and organize a revolution we know our first worry would be a matter of followers. You cannot conduct even a small civil war of the Mexican pattern without men a passion. And these followers must be numerous enough so that the first folk uncommitted, will not turn to and spank the bunch and kill the revolution through ridicule.

Statement of American Federation of Labor Backing Miners' Strike

Washington, Nov. 10.-The following statement, pledging organized labor's exempted specifically was re- full support to the mine strike, was issued last night by the executive council of the American Federation of Labor:

The executive council of the American Federation of Labor, called into special session in the city of Washington for the express purpose of considering the coal strike, the conditions which brought on the strike, as well as the court proceedings brought by the government, submit to our fellow citizens and to our fellow workers the following statement:

The executive council is of the opinion that the officers of the United Mine Workers of America did everything in their power to aver this great

"Of all the great industries in our country, there is none so dangerous to human life as the coal industry. The men who go down under the ground to dig coal, so that the domestic and industrial needs of the nation may be supplied, are engaged in work more hazardous than any other employment. "Due consideration has never been giveen to the danger surrounding

the coal miners. There is no other class of employment where each individual worker is so isolated, and in whose districts there is such a lack of opportunity for social intercourse and enjoyment.

SUFFER FROM UNEMPLOYMENT

"The condition of the miner and his family is such that he is practically deprived not only of sunshine and fresh air, but to a certain extent he is deprived of the association and companionship of all other human beings outside of his own particular class, who are themselves engaged in the dangerous and unhealthy occupation of coal mining.

"The miners suffer more than any other workers from periods of compulsory unemployment. "Authentic statistics show that the miners have less than 200 days of employment during each year. The wages of the miners consequently, hav-

ing to spread over the entire year, are greatly reduced as a result of the nonemployment existing in that industry. "The high cost of living has presented itself in perhaps a more serious form in isolated mining camps than in large industrial centers. There is usually not the same opportunity for the miners in the mining camps to make

their purchases to such advantage as is presented in other localities. Their isolation prevents this. The United Mine Workers in their convention, held during the month of September in the city of Cleveland, adopted a positive declaration de-

manding improved conditions of employment for the miners. "They further instructed the officers to proceed to obtain by negotiations with the operators the working conditions that the convention unanimously demanded. There were almost 2,000 delegates seated in the convention, represent

ing 500,000 organized miners "They further positively and exeplicitly instructed their officers that unless an agreement was reached on or before the first day of November, 1919, that the resolution of the convention calling for a strike on November

1, 1919, should be communicated to the membership. COMPELLED TO ORDER STRIKE.

There was no alternative except for the officers, who are elected by the membership, to carry out the direct instructions of the membership or resign from their positions as officers, in which event chaos and confusion

The officers of the mine workers, with their scale committee, entered into conferences with the operators in the city of Buffalo. They stated at the conference that they had full power to negotiate an agreement, in other words that they had the power to give and take in the conference. The employers refused to make any offer whatever.

"Later on the miners answered the call of the Secretary of Labor and further endeavored to reach an agreement, but failed.

The officers then proceeded to carry out the instructions of their membership and communicated the results of the failure of negotiations and, by order of the convention, the strike automatically took effect Nov. 1, 1919.

Why Mother Necessity is giving birth to this new brain-child of invention is related in a communication to the society by Dr. Alexander Graham Bell, as

"There is one obstacle to further advance in mechanical development, in the increasing price of the fuel necessary to work machinery. Coal and oil are going up and are strictly limited in quantity. We can take coal out of a mine, but we can never put it back. We can draw oil from subterranean reservoirs, but we can never refill them again. We are spendthrifts in the matter of fuel and are using our capital for

world's annual consumption has come so enormous that we are now as tually within measurable distance of the end of the supply. What shall we do when we have no more coal or oil!

'Apart from water power (which is strictly limited) and tidal and wave power (which we have not yet learned to utilize), and the employment of the sun's rays directly as a source of pow er, we have little left, excepting wood and it takes at least twenty-five years to grow a crop of trees.

There is, however, one other source of fuel supply which may perhaps solve this problem of the future. Alcoho makes a beautiful, clean, and efficient fuel, and, where not intended for consumption by human beings, can be manufactured very cheaply in an indigestible or even poisonous form. Wood alcohol, for example, can be em ployed as a fuel, and we can make alcohol from sawdust, a waste product of

"Alcohol can also be manufactured from corn stalks, and in fact from almost any vegetable matter capable of fermentation. Our growing crops and even weeds can be used. The waste products of our farms are available for this purpose and even the garbage from our cities. We need never fear the exhaustion of our present fuel supplies so long as we can produce an annual crop of alcohol to any extent desired.

"The world will probably depend upon alcohol more and more as time goe. on, and a great field of usefulness is opening up for the engineer who will modify our machinery to enable alcoho to be used as the source of power."

Springfield Offices Deserted By Leaders

By Associated Press Leased Wire Springfield, Ill., Nov. 10.-Headquar ers of the Illinois mine workers were deserted today, state officials of the 12th district having been summoned to Inlianapolis to confer at 10 o'clock this morning in an attempt to determine ow best to act on the order of Federal Judge A. B. Anderson that the strike of soft coal miners be called off by Tues day night.

Cierks and stenographers who were nolding down the miners' offices said they were not advised of any change in the strike situation which has re mained in status quo since the 90,000 mine workers in the state left their jobs Nov. 1.

Local strike leaders said miners were watching with great interest the result of today's conferences at Indianapolis, masmuch as doubt has been expressed as to whether international officials have power to rescind the strike order without authority from the rank and file through a convention.

Operators here were of the opinion that Acting President Lewis would be acting within the limits of his power in rescinding the strike order, subject to the will of a convention to be called later or a referendum.

There appeared to be considerable loubt in the minds of both miners and operators whether miners would return to work under compulsion.

419 EGGS FROM 20 HENS IN 30 DAYS

Mr. Dougherty Got This Result in October. Plan is Easily Tried.

"T tried Don Sung and the results were far past any expectations. I got 419 eggs in 30 days from 20 hens while moulting. I think this is wonderful, as they hardly laid at all before while moulting."—Frank Dougherty, 5940 E. 11th St., Indianapolis.

Mr. Dougherty bought \$1 worth of Don Sung tablets in October and wrote the above letter in November. Figure his profit on 35 dozen eggs from hens that formerly laid little or nothing.

This may sound too good to be true, This may sound too good to be true, but it costs nothing to find out. We'll

make you the same offer we made him. Give your hens Don Sung and watch results for one month. If you don't find that it pays for itself and pays you a good profit besides, tell us and your money will be promptly refunded. Don Sung (Chinese for egg-laying) works directly on the egg-laying organs, and is also a splendid tonic. It is easily given in the feed, improves the hen's health, makes her more active in

hen's health, makes her more active in any weather, and starts her laying. 'Try Don Sung for 30 days and if it doesn't get you the eggs, no matter what the weather, your money will be refunded by return mail. Get Don Sung from your druggist or poultry remedy dealer or send 50 cents for a package by mail prepaid. Burrell-Dugger Co., 284 Columbia Bldg., Indianapolis, Ind.

Leadership Through Service

A generation ago leadership in any industry was interpreted to mean the ruthless use of power.

Today it is recognized that leadership in industry is attained and maintained only when, through efficiency, an organization is able to render superior service.

A generation ago competition meant getting the business without regard for its effect on the industry.

Today competition means friendly rivalry in supplying the world with superior products at a minimum cost, and getting the business through superior service.

The Standard Oil Company (Indiana) enjoys a leading position in the petroleum industry, and is maintaining this leadership because it recognizes that this position can be measured only in terms of usefulness and service.

It is the ambition of those responsible for the activities of the Company to strengthen this leadership.

The Standard Oil Company (Indiana) believes that an organization can live and prosper only when it puts ideals of service above ideals of profit, which is exactly what the Standard Oil Company (Indiana) is doing. The profits earned are but a measure of the service rendered.

Thus does the Board of Directors of the Standard Oil Company (Indiana) interpret its obligation to the public and to the 4649 stockholders, not one of whom owns as much as 10 per cent of the total stock.

IF BACK HURTS USE SALTS FOR KIDNEYS

Eat less meat if Kidneys feel like lead or Bladder bothers you-Meat forms urie acid.

Most folks forget that the kidneys. like the bowels, get sluggish and clogged and need a flushing occasionally, else we have backache and dull misery in the kidney region, severe headaches, rheu-matic twinges, torpid liver, acid stomach, sleeplessners and all sorts of bladder dis-

You simply must keep your kidneys active and clean, and the moment you feel an ache or pain in the kidney region, get about four ounces of Jad Salts from any good drug store here, take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and is harmless to flush clogged kidneys and stimulate them to normal activity. It also neutralizes the acids in the urine so it no longer irritates, thus ending bladder disorders.

Jad Salts is harmless; inexpensive; makes a delightful effervescent lithia-water drink which everybody should take now and then to keep their kidneys clean, thus avoiding serious complications.

A well-known local druggist says he sells lots of Jad Salts to folks who believe overcoming kidney trouble while it is only trouble.

Chicago Market Was Nervous During Day

By Associated Press Leased Wire Chicago, Nov. 10-Moderate advances in the price of corn resulted today from wet weather likely to interfere with the crop movement. The market, however, was nervous owing to the strained in-dustrial situation as reflected by breaks in the stock market. Furthermore, receivers were reported as backing away from offerings of grain to arrive and as looking for lower prices. The opening which ranged from ¼c to ¾c higher, with December 1.33 to 1.33¼ and May 1.26% to 1.26¾, were followed by numerous rapid fluctations within a narrow

Evil Always to Be Fought.

There can be no compromise with evil. It never is right to license wrong, whatever golden returns it may offer or however difficult it may be to get rid of it. In our social life and in our personal life, wherever evil shows its hand there must be battle, not compromise.-Exchange.

No Peace for Russ Reds Yet Says Law

By Associated Press Leased Wire London, Eng., Nov. 10 .- Great Britin has no intention of opening peace negotiations with Lenine and Trotzky intil the house of commons has had an opportunity to discuss the subject, Mr. Bonar Law, the government leader, declared in the house of commons today.

To Take Baby's Picture. Anyone who has tried it knows it is

a difficult task to take an indoor picture of an active child. By placing the subject near a sunny window, but not in the direct sunlight, and with a sheet fixed at one side, high enough so that it reaches above the subject's head, good results may be obtained. If the child sits on the floor, the sheet will be high enough thrown over two
